Scopus Titles Selection Criteria

Category	Criteria
Journal Policy	Convincing editorial policy Type of peer review Diversity in geographical distribution of editors Diversity in geographical distribution of authors
Content	Academic contribution to the field Clarity of abstracts Quality of and conformity to the stated aims and scope of the journal Readability of articles
Journal Standing	Citedness of journal articles in Scopus Editor standing
Regularity	No delay in the publication schedule
Online Availability	Full journal content available online English language journal home page available Quality of journal home page

Minimum Criteria

Titles will only be considered for evaluation if they meet the following **minimum criteria:**

- **The title should publish peer reviewed content.**
- The title should be published on a regular basis (i.e. have an ISSN confirmed by the ISSN International Centre). To register an ISSN, please [visit this page](#).
- **The title should have English language abstracts and article titles.**
- The title should have a publication ethics and publication malpractice statement in the English language on its website.

Publication standards: Publication Ethics and Malpractice Statement requirement

Website

A journal's website, including the text that it contains, shall demonstrate that care has been taken to ensure **high ethical** and **professional standards**. It must not contain information that might mislead readers or authors, including any attempt to mimic another journal/publisher's site. An **'Aims & Scope' statement should be included on the website and the readership clearly defined**. There should be a statement on what a journal will consider for publication including authorship criteria (e.g., not considering multiple submissions, redundant publications) to be included. **ISSNs should be clearly displayed** (separate for print and electronic).

Name of journal

The Journal name **shall be unique** and **not be one that is easily confused with another journal** or that might mislead potential authors and readers about the Journal's origin or association with other journals.

Publication standards: Publication Ethics and Malpractice Statement requirement (cont.)

Peer review process

Journal content must be clearly marked as whether peer reviewed or not. Peer review is defined as obtaining advice on individual manuscripts from reviewers expert in the field who are not part of the journal's editorial staff. This process, as well as any policies related to the journal's peer review procedures, shall be **clearly described on the journal website**, including the method of peer review used. Journal websites should not guarantee manuscript acceptance or very short peer review times.

Ownership and management

Information about the ownership and/or management of a journal shall be clearly indicated on the journal's website. Publishers shall not use organizational or journal names that would mislead potential authors and editors about the nature of the journal's owner.

Governing body

Journals shall have **editorial boards** or other governing bodies **whose members are recognized experts in the subject areas included within the journal's scope**. The full names and affiliations of the journal's editorial board or other governing body shall be provided on the journal's website.

Publication standards: Publication Ethics and Malpractice Statement requirement (cont.)

Editorial team/contact information

Journals shall provide the full names and affiliations of the journal's editors on the journal website as well as **contact information for the editorial office, including a full address.**

Copyright and Licensing

The **policy for copyright shall be clearly stated in the author guidelines** and the copyright holder named on all published articles. Likewise, licensing information shall be clearly described in guidelines on the website, and licensing terms shall be indicated on all published articles, both HTML and PDFs. If authors are allowed to publish under a Creative Commons license then any specific license requirements shall be noted. Any policies on posting of final accepted versions or published articles on third party repositories shall be clearly stated.

Author fees

Any fees or charges that are required for manuscript processing and/or publishing materials in the journal **shall be clearly stated in a place that is easy for potential authors to find** prior to submitting their manuscripts for review or explained to authors before they begin preparing their manuscript for submission. If no such fees are charged that should also be clearly stated.

Publication standards: Publication Ethics and Malpractice Statement requirement (cont.)

Process for identification of and dealing with allegations of research misconduct

Publishers and editors shall take reasonable steps to identify and prevent the publication of papers where research misconduct has occurred, including plagiarism, citation manipulation, and data falsification/fabrication, among others. In no case shall a journal or its editors encourage such misconduct, or knowingly allow such misconduct to take place. In the event that a journal's publisher or editors are made aware of any allegation of research misconduct relating to a published article in their journal, the publisher or editor shall follow COPE's guidelines (or equivalent) in dealing with allegations.

Publication Ethics

A journal shall also have policies on publishing ethics. These should be clearly visible on its website, and should refer to: i) Journal policies on authorship and contributorship; ii) How the journal will handle complaints and appeals; iii) Journal policies on conflicts of interest / competing interests; iv) Journal policies on data sharing and reproducibility; v) Journal's policy on ethical oversight; vi) Journal's policy on intellectual property; and vii) Journal's options for post-publication discussions and corrections.

Publication standards: Publication Ethics and Malpractice Statement requirement (cont.)

Publishing schedule

The **periodicity at which a journal publishes** shall be clearly indicated.

Access

The way(s) in which the journal and individual articles are available to readers and whether there are associated **subscription or pay per view fees shall be stated**.

Archiving

A **journal's plan for electronic backup** and preservation of access to the journal content (for example, access to main articles via CLOCKSS or PubMed Central) in the event a journal is no longer published shall be clearly indicated.

Revenue sources

Business models or **revenue sources (e.g., author fees, subscriptions, advertising, reprints, institutional support, and organizational support) shall be clearly stated** or otherwise evident **on the journal's website**. Publishing fees or waiver status should not influence editorial decision making.

Publication standards: Publication Ethics and Malpractice Statement requirement (cont.)

Advertising

Journals shall **state their advertising policy** if relevant, including what types of adverts will be considered, who makes decisions regarding accepting adverts and whether they are linked to content or reader behaviour (online only) or are displayed at random. **Advertisements should not be related in any way to editorial decision making** and shall be kept separate from the published content.

Direct marketing

Any direct marketing activities, including solicitation of manuscripts that are conducted on behalf of the journal, shall be appropriate, well targeted, and unobtrusive. Information provided about the publisher or journal is expected to be truthful and not misleading for readers or authors.

The screenshot shows the homepage of the ASEAN Journal of Scientific and Technological Reports (AJSTR). The header includes the journal title, ISSN (2773-8752), and navigation links for Register and Login. A top navigation bar contains links for HOME, ABOUT THE JOURNAL, EDITORIAL TEAM, CURRENT, ARCHIVES, PEER REVIEW PROCESS, AUTHOR GUIDELINES, SUBMISSION, ETHICS, ANNOUNCEMENTS, and CONTACT. A search bar is located in the top right corner.

The main content area features a "Home" section with a welcome message and a description of the journal's commitment to peer-reviewed content. Below this, the journal's name and ISSN are listed, along with its start year (1998) and language (English).

A photograph of the Editor-in-Chief, Sompong O-Thong, is displayed. Below the photo, his name and a link to his biography are provided.

On the right side, there is a "JOURNAL INFORMATION" section featuring a TCI logo and a note that the journal is approved by TCI during 2020-2024. Below this, it is noted that the journal is indexed in TCI and JTEI, with Sompong O-Thong as the editor.

Further down, an "INFORMATION" section provides links for readers, authors, and librarians. At the bottom, an "INDEXED IN" section displays the ASEAN Citation Index logo.

About the Journal

Aims and Scope

The ASEAN Journal of Scientific and Technological Reports (AJSTR) is an international peer-reviewed journal that publishes original research papers and reviews the fields of **agricultural and biological sciences, engineering and technology, computer science**, and other related science and technology. The journal is dedicated to promoting the advancement of science and technology in the ASEAN region and beyond by providing a platform for researchers, scientists, and academics to publish their research findings and share their knowledge with the broader scientific community. AJSTR welcomes submissions from researchers, scientists, and academics in the ASEAN region and around the world on topics including:

- **Agricultural and Biological Sciences**
Plant Science, Soil science, Animal Science, Crop Science, Aquaculture and Fisheries, Horticulture, Food Science, Agriculture Ecology, Veterinary Medicine, Agricultural Microbiology, Agricultural Biotechnology, Agricultural Engineering, and Environmental Science
- **Engineering and Technology**
Civil Engineering, Mechanical Engineering, Energy Engineering, Electrical Engineering, Chemical Engineering, Environmental Engineering, Materials Science, Process Engineering, Biological Engineering, Ecological Engineering, Applied Engineering, Rubber Technology, Bioenergy, Nanotechnology, and Climate Change
- **Computer Science**
Software Engineering, Information Technology, Artificial Intelligence, Robotics, Internet of Things (IoT), Media, Web Applications, Deep Learning, and Cybersecurity
- Other related science and technology
Experimental Physics, Astronomy, Space Science, Organic and Inorganic Chemistry, and Physical and Analytical Chemistry.

All submissions to AJSTR undergo a rigorous peer-review process to ensure the quality and validity of the published research. The journal encourages the submission of papers that present innovative and original research, as well as those that contribute to the development of new theories, methodologies, and techniques in the fields of agricultural and biological sciences, engineering and technology, computer science, and other related science and technology.

AJSTR is committed to promoting open access to scientific research and aims to make research accessible to a broader audience, including researchers and students in developing countries who may not have access to expensive scientific journals. The journal also seeks to foster collaboration and partnerships between researchers in the ASEAN region and around the world and to facilitate the exchange of ideas and knowledge between different scientific disciplines.

INDEXED IN

แนวทางการปรับปรุงคุณภาพเว็บไซต์

About the Journal (cont.)

- Types of Published Articles
- Publication Frequency
(Number of issue/year and published month)
- Language
- Publication Charges
- Open Access Policy

Types of Published Articles

AJSTR is published either as a research article or a review article.

1. **Research articles** report original research findings in agricultural and biological sciences, engineering and technology, computer science, and other related science and technology. The research article should include a clear research question, methodology, results, and conclusion. The article should also provide a clear and concise discussion of the research findings, their implications, and their contributions to the relevant field of study. AJSTR does not accept case studies unless it is a study that has a wide impact on the community or industry. The total length of the manuscript, including references, must not exceed 8000 words.

2. **Review articles** comprehensively review the existing literature on a specific topic in agricultural and biological sciences, engineering and technology, computer science, and others related to science and technology. Review articles should critically analyze and synthesize the literature, identify knowledge gaps, and suggest future research directions. The format and length of review papers are more flexible than research articles. Typical reviews are less than 12,000 words, including references.

All published articles in AJSTR should be based on rigorous and ethical research and adhere to the highest standards of scientific integrity. The journal encourages the submission of articles that present innovative and original research and contribute to developing new theories, methodologies, and techniques.

Publication Frequency

AJSTR publishes four issues per year (January - March, April - June, July - September, and October - December) with a number of articles per issue of 8-10, 4 issues per year starting from Vol. 24, issue No. 1 in 2021. The journal aims to provide timely and regular publication of high-quality research in the relevant fields of study.

Language

AJSTR requires that all articles be written in the English language. Clear and concise language and adherence to proper grammar and spelling are encouraged.

Publication Charges

The publication fee is charged when the manuscript is accepted for publication in AJSTR. The publication fee is 4,000 baht or 150 US dollars. Authors are informed about the fee at the time of acceptance.

Open Access Policy

The journal aims to promote open access to scientific research and to make research accessible to a broader audience. AJSTR is an open-access journal, meaning all published articles are freely available online to anyone, anywhere in the world.

About the Journal (cont.)

- Ownership and Management
- Publisher
- Copyright and Licensing
- Revenue Sources

Ownership and Management

Thaksin University is the proud owner of the ASEAN Journal of Scientific and Technological Reports (AJSTR). The journal receives partial support from the Research and Development Institute of Thaksin University. The operation and management of AJSTR are made possible through various funding sources, including publication fees. This financial support allows AJSTR to maintain its high publication standards, rigorous peer-review process, and open-access availability to researchers and readers worldwide. Thaksin University's commitment to promoting scientific research and technological advancement is exemplified by its ownership and support of AJSTR, fostering the dissemination of valuable knowledge and facilitating collaborations within the ASEAN region and beyond.

Publisher

AJSTR is the official peer-reviewed journal of the Research and Development Institute, Thaksin University, Thailand.

Copyright and Licensing

AJSTR values copyright protection and licensing to safeguard author rights and facilitate the appropriate dissemination of research. Our policies ensure openness, accessibility, and attribution. Authors retain copyright ownership, and articles are published under a Creative Commons Attribution License (CC BY), allowing sharing, adaptation, and proper attribution. Authors have the freedom to publish under the CC BY license, granting broad reuse and distribution permissions. AJSTR supports posting articles on third-party repositories, adhering to institutional and funding restrictions. Author guidelines detail copyright and licensing requirements, empowering authors with knowledge about their rights and responsibilities. These policies cultivate an environment of collaboration, openness, and responsible sharing, benefiting authors and the research community while honoring intellectual property rights.

Revenue Sources

AJSTR employs various revenue sources to sustain its operations and uphold transparency. We provide clear information about our revenue model on our website. Our revenue sources include Article Processing Charges (APCs), which authors pay upon manuscript acceptance to cover publication costs. Institutional support from Thaksin University and other academic institutions aids our administrative and technological needs. We may display relevant advertisements that do not compromise content integrity. Grants, sponsorships, and donations from aligned entities support initiatives like special issues and conferences. Importantly, our revenue sources do not influence editorial decisions; manuscripts are evaluated solely on scientific merit. We prioritize affordability, accessibility, and publishing standards to maintain transparency in our operations.

About the Journal (cont.)

- Advertising
- Direct Marketing
- Journal History: name change (former name, ISSN & start year), language change, scope change

Advertising

AJSTR maintains transparency and integrity through its advertising policy. Relevant and appropriate advertisements, such as academic conferences, educational programs, and research tools, are considered. The editorial board or an advertising committee makes decisions based on relevance and quality. Advertisements do not influence editorial decisions, ensuring the scientific merit of manuscripts. They are displayed separately from published content, clearly distinguished, and placed in designated sections. Advertisements are not linked to specific content or reader behavior, selected based on relevance, or displayed randomly. AJSTR prioritizes professionalism, ethics, and the separation of advertising from scientific content, upholding editorial independence and article integrity.

Direct Marketing

AJSTR employs direct marketing activities to promote the journal while maintaining ethical standards. Our approach involves targeted outreach to researchers and academics in relevant fields, ensuring accurate and informative communication about AJSTR's mission and features. We prioritize transparency, obtaining consent, and respecting data privacy regulations. Our unobtrusive approach aims to provide valuable information without overwhelming recipients. We comply with applicable regulations and continuously review our practices for compliance. AJSTR is dedicated to responsible and ethical direct marketing, engaging the scientific community, fostering collaborations, and transparently disseminating high-quality research.

Journal History

AJSTR has a rich history dating back to 1998 when Thaksin University established it as the "Thaksin University Journal (Thaksin Univ J; online ISSN 2651-0693)" with publications in Thai and English. In 2021, the journal shifted its focus to promoting research from the Association of Southeast Asian Nations (ASEAN) countries and began only accepting English manuscripts. AJSTR focuses on research integrating multiple fields or subfields within agricultural and biological sciences, engineering and technology, and computer science. Thaksin Univ J was renamed into the ASEAN Journal of Scientific and Technological Reports (AJSTR) to attract more international readers and authors. AJSTR is committed to promoting access to research and knowledge in the scientific community, particularly in ASEAN countries with limited access to scientific journals.

ABSTRACT

Pineapple peel waste has recently been interested in being utilized as a low-cost carbon source in PHA biosynthesis to reduce the production cost of PHA. The production of copolymer Poly(3-hydroxybutyrate-co-3-hydroxyvalerate) [PHBV] by the new *Bacillus megaterium* PP-10 was investigated. The bacteria were grown in a mixture of pineapple peel hydrolysate (PPH) and 3-hydroxyvalerate (3HV) precursor such as sodium propionate or sodium valerate at ratios of 1:1. Remarkably, the microbial growth and PHBV production in a mixture of PPH and sodium valerate

Ethics

- Ethics for author, reviewers & editors

HOME / Ethics

Ethics

Publication Ethics

The ASEAN Journal of Scientific and Technological Reports (AJSTR) adheres to the highest standards of publication ethics and is committed to maintaining integrity and transparency in the publishing process. We expect all authors, reviewers, and editors to adhere to ethical guidelines and conduct themselves professionally. Our publication ethics and publication malpractice statement includes the following principles:

1. Authors' Responsibilities:

- Authors must ensure that their submitted work is original and has not been previously published elsewhere.
- Authors should accurately acknowledge the work of others and cite relevant sources.
- Authors are responsible for providing accurate and complete information and ensuring the validity of their research findings.
- Authors should disclose any potential conflicts of interest that may influence their work.

2. Reviewers' Responsibilities:

- Reviewers should conduct reviews objectively and provide constructive feedback.
- Reviewers should treat all manuscripts as confidential and not disclose information to unauthorized individuals.
- Reviewers should declare any conflicts of interest that may affect their ability to review a manuscript impartially.

3. Editors' Responsibilities:

- Editors should ensure a fair and unbiased peer review process.
- Editors should maintain the confidentiality of manuscripts and only disclose information to those involved in the review process.
- Editors should evaluate manuscripts based on their academic merit, relevance, and originality.
- Editors should handle any potential conflicts of interest or ethical issues that may arise during the publication process.

4. Publication Malpractice:

- AJSTR will not tolerate any form of academic misconduct, including plagiarism, data fabrication, and improper authorship attribution.
- In cases of suspected misconduct, AJSTR will investigate the matter thoroughly and take appropriate action, including retracting or correcting published articles.

AJSTR strives to promote transparency and ethical practices in scientific research and publication. We encourage authors, reviewers, and readers to familiarize themselves with our publication ethics and malpractice statement to ensure the highest standards of integrity and scholarly conduct are upheld throughout the publishing process.

Ethics (cont.)

- **Allegations of Research Misconduct**

Allegations of Research Misconduct

AJSTR is committed to upholding the highest standards of research integrity and ethical publishing practices. We take all allegations of research misconduct, including plagiarism, citation manipulation, and data falsification/fabrication, seriously. Our process for identifying and dealing with such allegations follows the guidelines set forth by the Committee on Publication Ethics (COPE) or equivalent standards.

Identification:

- AJSTR employs rigorous peer review processes and plagiarism detection software to identify potential cases of research misconduct.
- Editors and reviewers are trained to recognize signs of research misconduct and are encouraged to report any concerns or suspicions.

Dealing with Allegations:

- Upon receiving an allegation of research misconduct, the Editor-in-Chief and the Editorial Board carefully evaluate the evidence and follow COPE's guidelines or equivalent standards to conduct a thorough investigation.
- The accused author(s) will be provided with an opportunity to respond to the allegations and present their case.
- AJSTR maintains confidentiality throughout the investigation process to protect the privacy and reputation of all parties involved.
- If the investigation confirms the presence of research misconduct, appropriate actions will be taken, which may include retraction, correction, or expression of concern, as guided by COPE's guidelines or equivalent standards.
- Allegations found to be unsubstantiated or lacking sufficient evidence will be dismissed, and all parties involved will be notified of the outcome.

AJSTR is committed to promoting research integrity and ensuring the integrity of scientific literature. We work diligently to prevent and address research misconduct, maintaining the trust of our readers, authors, reviewers, and the broader scientific community. We encourage all stakeholders to report any concerns or allegations of research misconduct through our established channels, and we will address them promptly and appropriately in accordance with established guidelines and standards.

Author Guidelines

- Template (MS Word, PDF)
- Article format
- Reference format

Source: ASEAN Journal of Scientific and Technological Reports

[HOME](#) / [Author Guidelines](#)

Author Guidelines

[Download Template](#)

Main manuscript

The main manuscript will be sent to reviewers and will not show the names and addresses of the author(s). It will be composed of the following.

1. Title

- 1.1 The length of the title should not exceed 250 characters.
- 1.2 A title should be written in sentence case with only the first word of the text, proper nouns, and genus names being capitalized.
- 1.3 Avoid any abbreviations if possible.
- 1.4 The title should address whether the submission is for systematic review, meta-analysis, or clinical trial.

2. Author names

- 2.1 First names (or first initials) in combination with full middle names
- 2.2 Middle names (or initials, if used)
- 2.3 Last names (surnames, family names)

3. Affiliations (indication of multiple affiliations or current addresses where appropriate)

- 3.1 Department, Faculty, University, or organizational affiliation
- 3.2 Location: city, state/province (if applicable), postcode
- 3.3 Country

4. Corresponding author

- 4.1 Full name
- 4.2 Affiliation
- 4.3 Telephone number, Fax number (if applicable)
- 4.4 E-mail address

5. Abstracts

The abstract of your manuscript should consist of a single paragraph containing no more than 250 words. It should provide a self-contained and concise research summary, including the rationale, methodology, results, and conclusions. Uncommon abbreviations should be spelled out when first used. We highly recommend that authors structure their abstracts according to the following format without using explicit headings:

1. Background: Situate the research question within a broader context and emphasize the study's purpose.
2. Methods: Briefly describe the main methods or treatments employed in the study.
3. Results: Summarize the primary findings of the article.
4. Conclusions: State the main findings or interpretations derived from the research.

By following this structured abstract style, readers can quickly grasp the key aspects of your study concisely and organized.

6. Keywords

List 3-5 pertinent keywords specific to the article yet reasonably common within the subject discipline. Keywords (3-5 words) must be listed below the abstract.

7. Introduction

- Main Results/Discussions

Abstract

Background and Objectives: Academic journals in Thailand are a prominent source of information in the academic community. At present, there is a constant development of quality and database. There are articles constantly sent to organizations that provide academic journals in Thailand. In providing journal services, the article management sequences should conduct with communication. Sometimes communication does not go as smoothly and leads to Thai journal service problems. Regarding mentioned passages, the researcher decided to study the context, problems, and principles appropriate for the Thai journal service, the principle of mindfulness for communication regarding Theravada Buddhist scriptures, and the application of mindfulness in communication for making a happy and peaceful environment for Thai journal service.

Methodology: The study employed a qualitative research method by collecting data from related documents and in-depth interviews.

Main Results: From the study, the following results are found: 1) The communication contexts of journal work consist of communication within the organization and communication outside the organization. The communication problems consist of internal problems and external problems. Internal factors that cause communication problems consist of emotion, perception, experience, belief, and attitude. Internal factors consist of information for communication and the ways of communication and time. The principle for communication in providing Thai journal service consists of being informed, understanding, reliable, fair, enthusiastic, leaving an impression, and being able to listen; 2) Mindfulness should be used in communication by controlling and directing

appropriate and effective communication which brings to making a standard for peaceful communication in Thai journal service.

Involvement to Buddhadhamma: The application of mindfulness for communication in Thai journal services is related to the characteristic of applied Buddhism consists of the principle of mindfulness and well-spoken speech which significantly regulate awareness for anyone whether physically, verbally and mentally for adapting it for communication in providing Thai journal service.

Conclusions: Communication is crucial in driving the journal to be able to continue providing service. Being mindful make service provider cautious in communication and get the best results and prevent problems that may lead to conflicts in the service. When problems occur, they must be promptly resolved without negligence and be conscious of controlling the situation in communication so that the journal can efficiently continue providing service.

Comments for Scopus team:

Comments from the Chair of the Local Board of Thailand (Prof. Narongrit Sombatsompop) Overall, the ASEAN Journal of Scientific and Technological Reports (AJSTR) publishes original research and review articles in agricultural and biological sciences, engineering, computer science, and other related science and technology. AJSTR is unique because it relates to ASEAN issues and provides research findings on agricultural practice, biological diversity, and applied science and technology in ASEAN. It is envisaged that the AJSTR journal will benefit ASEAN education and research programs. Having investigated the past performance of the journal, a good diversity of the international authors is found. Published articles were written by authors from ASEAN and Asia-Pacific Regions like the Philippines, Australia, Korea, and Thailand, and from all over the world, such as France, Canada, the United Kingdom. In addition, The Editorial Board members of the journal are also from leading educational and research institutions, "mainly from ASEAN" countries (Thailand, Indonesia, Malaysia, Philippines, Cambodia), Asia (Taiwan, Japan and Pakistan) and other countries outside Asia like USA, Canada, and Spain. . I have done some work on Citation Counts (using previous and current journal names) and found that there are 102 citations in Scopus, cited by authors from 24 different countries (such as, Iraq, Canada, France, Indonesia, Malaysia, Nigeria, South Korea, United States, Australia, Brazil, Demark, Germany, India, Italy, Japan, Mexico, South Africa, United Kingdom, etc.), this

Italy, Japan, Mexico, South Africa, United Kingdom, etc.), this suggesting international visibilities of the journal. Also, the journal obtains 420+ citations in the Thai-journal Citation Index (TCI) and ASEAN Citation Index (ACI) databases. In addition, on the website, over 600,000 views are seen although about 50% are viewed by Thai researchers. It is another good sign for the journal visibility. In conclusion, the AJSTR is a unique journal that would generate shared solutions to existing agricultural practice, biological diversity, and applied science and technology in ASEAN countries. The archives of open-access journal are well maintained since 1998. The hosting of the journal is Thaksin University which is a well-known international institution located in Songkhla province since 1973. As a consequence of the above performance, this journal was pre-evaluated and finally selected by the Thai local board to be one of the 40 selected journals under TCI-Scopus collaboration project. I therefore strongly recommend this journal be included in Scopus database. Sincerely yours, Prof. Narongrit Sombatsompop (Chair of Thai Local Board)

Preselection decision supporting reason(s):

- Highly cited editors
- Title is highly cited in Scopus
- Title has a broad interdisciplinary scope
- Supports new researchers in the field
- High quality of presented research
- Excellent editorial policy and peer review
- Broad international diversity among editors
- Convincing journal policy
- Excellent content
- Last issue according to schedule
- Good online accessibility of the journal
- Articles are sound and internationally relevant.
- Excellent abstracts quality
- Content in line with stated aims and scope
- Articles are well written and understandable
- Title is an welcome addition for the subject area
- Clear peer review type and guidelines
- Other: This title has been carefully selected and recommended by the Thai Local boards under the TCI-SCOPUS collaboration project for inclusion in Scopus.

Journal policy

Purpose of the journal (according to publisher/editor):

The ASEAN Journal of Scientific and Technological Reports (AJSTR) is an international peer-reviewed journal that publishes original research papers and reviews the fields of agricultural and biological sciences, engineering and technology, computer science, and other related science and technology. The journal is dedicated to promoting the advancement of science and technology in the ASEAN region and beyond by providing a platform for researchers, scientists, and academics to publish their research findings and share their knowledge with the broader scientific community. AJSTR welcomes submissions from researchers, scientists, and academics in the ASEAN region and around the world on topics including: • Agricultural and Biological Sciences Plant Science, Soil science, Animal Science, Crop Science, Aquaculture and Fisheries, Horticulture, Food Science, Agriculture Ecology, Veterinary Medicine, Agricultural Microbiology, Agricultural Biotechnology, Agricultural Engineering, and Environmental Science • Engineering and Technology Civil Engineering, Mechanical Engineering, Energy Engineering, Electrical Engineering, Chemical Engineering, Environmental Engineering, Materials Science, Process Engineering, Biological Engineering, Ecological Engineering, Applied Engineering, Rubber Technology, Bioenergy, Nanotechnology, and Climate Change • Computer Science Software Engineering, Information Technology, Artificial Intelligence, Robotics, Internet of Things (IoT), Media, Web Applications, Deep Learning, and Cybersecurity • Other related science and technology Experimental Physics, Astronomy, Space Science, Organic and Inorganic Chemistry, and Physical and Analytical Chemistry

Remarks:

[Not applicable]

Start year of current title:

2021

Start year of first predecessor:

1998

History of title:

AJSTR has a rich history dating back to 1998 when Thaksin University established it as the "Thaksin University Journal (Thaksin Univ J; online ISSN 2651-0693)" with publications in Thai and English. In 2021, the journal shifted its focus to promoting research from the Association of Southeast Asian Nations (ASEAN) countries and began only accepting English manuscripts. The AJSTR focuses on research integrating multiple fields or subfields within agricultural and biological sciences, engineering and technology, and computer science. Thaksin Univ J was renamed into the ASEAN Journal of Scientific and Technological Reports (AJSTR) to attract more international readers and authors. AJSTR is committed to promoting access to research and knowledge in the scientific community, particularly in ASEAN countries with limited access to scientific journals.

Peer review process description:

All submissions to the AJSTR undergo a rigorous peer-review process to ensure the quality and validity of the published research. The journal operates a double-blind peer review process, meaning that the authors and the reviewers are anonymous. The review process is carried out by experts in the relevant fields of study, who evaluate the submitted manuscripts based on their scientific merit, originality, and relevance to the journal's scope. 1. Initial evaluation: Upon receipt of a manuscript, the editorial board will conduct an initial evaluation to ensure that the manuscript meets the scope and focus of the journal and adheres to the publication conditions. Manuscripts that do not meet these requirements will be rejected without further review. The manuscript with a higher than 30% similarity will be rejected in this stage. The editorial office will check the article formatting and citation styles and adhere to the specified author guidelines. If the required conditions are unmet, the manuscript will be returned to the author for reformatting and resubmission. If the manuscript passes approval, it will be sent to reviewers. 2. Assignment of reviewers: The editorial board will select five independent reviewers who are experts in the relevant field of study and have experience in the research area the manuscript covers. The reviewers will be blinded to the identity of the authors, and the authors will be blinded to the identity of the reviewers. The listing of the name(s) of the author(s), acknowledgments, and references to author contributions must be removed from the manuscript and posted in the Title page file. The assigned editor will then send invitations to reviewers. The invited reviewers are expected

Journal policy

covers. The reviewers will be blinded to the identity of the authors, and the authors will be blinded to the identity of the reviewers. The listing of the name(s) of the author(s), acknowledgments, and references to author contributions must be removed from the manuscript and posted in the Title page file. The assigned editor will then send invitations to reviewers. The invited reviewers are expected to be affiliated with differing institutions from those of the corresponding authors. Moreover, reviewers will consider the invitation according to their own scientific expertise, any potential conflicts of interest, and other relevant criteria. Our journal is committed to assigning reviewers within two weeks. 3. Review process: The reviewers will evaluate the manuscript based on its scientific quality, originality, validity, and relevance to the field of study. The reviewers are usually given two weeks to review the research work. They will provide constructive feedback to the author(s) to help improve the manuscript and may recommend acceptance, rejection, or revision of the manuscript. 4. Decision: The editor-in-chief will make the final decision on whether to accept, reject, or request a revision of the manuscript based on the feedback provided by the reviewers and the manuscript's adherence to the publication conditions. If the comments/responses of the reviewers differ significantly, the academic editor may invite an additional individual to review the manuscript before making the final decision. The academic editor will send a decision (with rejection, acceptance, or the need for major or minor revisions) to the author via the online system, along with any relevant comments submitted by the reviewers. As our journal adopts the double-blind, peer-review principle, all comments and suggestions remain anonymous. The average time from submission to the first decision will be one month, and from acceptance to publishing will be 2-4 weeks. 5. Revision process: If the manuscript is accepted with revision, the author(s) will be asked to revise the manuscript based on the feedback provided by the reviewers and resubmit it for further review. Re-submitted material must include the revised manuscript with highlighted changes and a rebuttal letter. The author is usually given two weeks (for minor revisions) and four weeks (for major revisions) to revise the manuscript. The major revised manuscript will undergo a second round of review by the same reviewers, who will evaluate whether the revisions adequately address their feedback. For minor revisions, the subsequent review process may not be necessary. 6. Publication: Once the manuscript has been accepted for publication, the author(s) will be asked to submit a final version of the manuscript, which will be copyedited and formatted for publication in the journal. This peer review process will ensure that all manuscripts submitted to the ASEAN Journal of Scientific and Technological Reports are evaluated based on the highest standards of scientific integrity and ethical conduct and that only the highest quality research is published.

Your vote

Your vote:

Level of confidence:

Supporting reason(s):

Positive reasons

- Convincing journal policy
- Excellent content
- Citedness above expectations
- Last issue according to schedule
- Good online accessibility of the journal
- Articles are sound and internationally relevant.
- Scholarly relevance as evidenced by citations
- Excellent abstracts quality
- Abstracts meet English language requirement
- Content in line with stated aims and scope
- High quality articles in line with journal's aims
- Articles are well written and understandable
- Journal offers translation to support readability
- Title is an welcome addition for the subject area
- Clear aims/scope in line with published content
- Narrow scope but serves niche audience
- Single blind peer-review acceptable for field
- Clear peer review type and guidelines
- A list of peer reviewers is published annually

Negative reasons

- Inferior journal policy
- Poor content
- Citedness below expectations
- Delay in publishing schedule
- Journal not easily accessible online
- Poor figures in some articles
- Poor language and grammar in articles
- Most articles make little contribution to field
- Insufficient citations despite journal's ages
- Uneven scholarly quality within articles
- Abstracts too short and undetailed
- Abstracts not understandable or inadequate
- Abstracts are machine translated
- Unclear author guidelines for abstracts
- Articles not in line with stated aims and scope
- Articles of low academic quality
- Subject already well covered by other journals

- Limited interest in subject area
- Unclear stated aims and scope
- Internationality not supported by aims & scope
- poor quality of the references
- Low citations in good journals indexed in Scopus
- The geographical reach of authorship and/or content
- articles published by editorial team is high
- not enough good articles for Scopus inclusion
- Name of title similar to an existing title
- Editorial board is institution/nationally focused
- Editors not clearly identifiable
- Peer review process inappropriate/unclear
- Author fees/charges unclear on website
- No organized archive of articles on website
- unclear or missing date received/revised/accepted
- No DOIs assigned to articles
- Website is missing a valid Pub. Ethics statement
- No information on archiving policy of journal

Other:

Comments for Subject Chair

Having considered the above 10 articles. I feel that the quality of the articles are acceptable and have contents of international interests. Consequently, I stress that this journal is suitable for accepting for indexing in Scopus.

Comments for Scopus team:

Comments from the Chair of the Local Board of Thailand (Prof. Narongrit Sombatsompop) Overall, the ASEAN Journal of Scientific and Technological Reports (AJSTR) publishes original research and review articles in agricultural and biological sciences, engineering, computer science, and other related science and technology. AJSTR is unique because it relates to ASEAN issues and provides research findings on agricultural practice, biological diversity, and applied science and technology in ASEAN. It is envisaged that the AJSTR journal will benefit ASEAN education and research programs. Having investigated the past performance of the journal, a good diversity of the international authors is found. Published articles were written by authors from ASEAN and Asia-Pacific Regions like the Philippines, Australia, Korea, and Thailand, and from all over the world, such as France, Canada, the United Kingdom. In addition, The Editorial Board members of the journal are also from leading educational and research institutions, "mainly from ASEAN" countries (Thailand, Indonesia, Malaysia, Philippines, Cambodia), Asia (Taiwan, Japan and Pakistan) and other countries outside Asia like USA, Canada, and Spain. . I have done some work on Citation Counts (using previous and current journal names) and found that there are 102 citations in Scopus, cited by authors from 24 different countries (such as, Iraq, Canada, France, Indonesia, Malaysia, Nigeria, South Korea, United States, Australia, Brazil, Demark, Germany, India, Italy, Japan, Mexico, South Africa, United Kingdom, etc.), this suggesting international visibilities of the journal. Also, the journal obtains 420+ citations in the Thai-journal Citation Index (TCI) and ASEAN Citation Index (ACI) databases. In addition, on the website, over 600,000 views are seen although about 50% are viewed by Thai researchers. It is another good sign for the journal visibility. In conclusion, the AJSTR is a unique journal that would generate shared solutions to existing agricultural practice, biological diversity, and applied science and technology in ASEAN countries. The archives of open-access journal are well maintained since 1998. The hosting of the journal is Thaksin University which is a well know international

- Broad international diversity among editors
